

Our Company Profile

About us

Sinno Tech Africa is a Proudly South African, digital technologies company based in Sunninghill, in the iconic city of Johannesburg. Our company is a Level 1 BEE contributor with 135% Recognition and 100% black ownership. Since inception in 2015, our company has been spearheading digital transformation for businesses of all sizes across multiple sectors in South Africa. Our aim is to ensure that our clients get improvement of efficiency and the convenience of maximizing on time.

We offer a wide range of ICT services that help our clients navigate the complex world of IT with ease and efficiency. Working with us means you are taking a long-term position of business trajectory as ICT is not a once of thing, but an evolving and transforming aspect that can determining the rise or fall of your business. Our company was established with a vision of being the preferred black owned ICT supplier that is able to provide these services to our clients with excellence and efficiency.

We are very passionate about empowerment and the development of remote mining communities, is one of our passions. We aim to empower our people on Information Technology education as we believe that they are the real benefactors of digital transformation. Our company has seasoned professionals who have gained considerable experience through the years and have developed the expertise required to be able to render professional services to our clients.

Our Vision

To be recognized as one of the preferred black owned ICT suppliers for several multi-national organisations that empower our clients with the tools required, to reach their business goals through continuous improvement in processes and quality.

Our Mission

To utilise our expertise and tools to empower and develop small and large enterprises who are in need of tools in the ICT space, to assist them with enhancing functionality of their businesses and reporting with ease.

Why choose us?

Proven expertise:

Our experience & expertise solutions guarantee complete business resilience in the face of any eventuality.

Enabled environment:

Our multiple delivery centres across the country allow us to provide clients with a choice of live-site environments across different regions.

Flexibility:

We assist our clients in streamlining maintenance & increasing their security, while enhancing flexibility for their users, enabling productivity on any device.

Platform agnostic technologies:

Our AI-powered telco cloud platform enables the automation of network operations for our clients to transform their networks, evolve to zero-touch operations, reduce OPEX and deliver services faster.

Robust technology infrastructure:

Our clients have around-the-clock access to a technical team of IT support professionals and our state-of-the-art technology infrastructure, which includes resilient HA LAN infrastructure with scalable secure VLANs and firewalls.

- Productivity Applications
 - Licensing

Our Solutions

At Sinno Tech Africa, we offer modern solutions that are designed to modernise and transform your ICT space and ensure that your business is able to have its infrastructure managed efficiently and adequate reporting is attained, thus increasing service excellence.

Application Modernization

At Sinno Tech Africa we update your software by overhauling it with new infrastructure platforms. Instead of doing away with or retiring the existing system, we extend its lifespan using emerging and relevant systems to Improve engagement, increase scalability, speed and stability.

Back up and Disaster recovery

Sinno Tech Africa specializes in cloud backup, onsite back, and disaster recovery. We monitor your cloud backup daily, manage the security and are available to restore your data at a moment's notice so you can be protected against threats from Cybercriminals, rogue employees, or simply accidental deletion.

Cloud and Virtualization

At Sinno Tech Africa, we help organisations store and access data securely in the cloud to offer fast innovation, flexible resources, and efficient business operations. Utilising cloud-based services means businesses can manage operational costs and budget effectively for what they need, as well as ensuring their infrastructure is managed efficiently.

Edge Computing

Our Edge computing helps our clients unlock the potential of the vast untapped data that's created by connected devices. This helps clients manage software distribution at a massive scale, leverage open-source technology, address security concerns as well as engage with our trusted partners who have deep industry experience.

Management

Our company is managed by its founder Mr. Kevin M. Kekana who has over 8 years of experience working in various ICT companies in roles such as Technical Support Engineer and Managing various accounts. This experience has been critical in the day to day running of Sinno Tech Africa and developing strategy and account management as well as enhancement.

Mr. Kekana holds a BTech in IS and Technology management, Postgraduate Diploma in Business Administration with a Digital Transformation Lens. He is credited with a mindset that drives and shapes organizational behaviours in order to manage change in agile environments, thus, helping businesses navigate the digital economy.

His passion for the development of people in the ICT space and empowering people with Information Technology education, is what drives Sinno Tech Africa which aims to transform Africa, by using the expertise and experience that Mr. Kekana has attained over the years. Sinno Tech Africa, does have in its employ, skilled ICT professionals that assist the company in meeting its mission and in turn we assist in developing their skills and provide them with exposure in the industry. We believe in empowering our staff because capable and responsible people create success, both for our clients and our company.
